Alejandra Calderón Méndez

Business & Operations Analyst - Process Improvement & Automation

Madrid, Spain | +34 605 08 64 28 | calderonmendezalejandra@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Bachelor's degree in **Service Science, Management and Engineering**, with hands-on experience in **business analysis, process optimization, and automation**. Skilled in **translating business requirements into technology-driven solutions**, combining data analysis, web application development, and AI-powered automation to improve operational efficiency, traceability, and business process management. Technical knowledge of web development, databases, and data visualization, complemented by experience working on cross-functional and international projects, collaborating with teams across different departments and locations.

CORE COMPETENCIES

Business Analysis (BPMN, ITIL, Lean, Kanban, Archi)
Process Engineering (SAP EPM, SAP Analytics Cloud)
Data Analysis & Visualization (Power BI, Python)
Web Development (Angular, Node.js, SQL Server)
Process Automation (Microsoft Copilot Studio)
International Collaboration (English, Chinese)

PROFESSIONAL EXPERIENCE

BOSCH | Data Analysis & Process Automation Intern **November 2025 – July 2026**
Quality Department · Automotive Industry

- **Process Optimization**: Developed a web application to manage quality complaints using the 8D methodology, **reducing processing time for stages D1, D2, and D3 by 83%, from 2 hours to 20 minutes**, while improving deadline tracking and corrective action monitoring.
- **Operational Automation**: Developed a second web application to streamline the Blocking & Fencing process for non-conforming parts, automating cross-departmental communication and enhancing process traceability.
- **Data Analysis & Visualization**: Integrated Excel data into SQL Server to enable data analysis, reporting, and visualization through Power BI.
- **AI-Powered Automation**: Developed AI agents using Microsoft Copilot Studio to automate repetitive tasks and streamline operational workflows.
- **International Collaboration**: Contributed to cross-functional projects involving teams from different production plants and business units, collaborating in an international working environment.

EDUCATION

BACHELOR'S DEGREE IN SERVICE SCIENCE, MANAGEMENT AND ENGINEERING

September 2022 – November 2026
Universidad Rey Juan Carlos, Madrid (Spain)

Multidisciplinary academic background in **business analysis, business process management and modeling, data analytics, and information technology**, combining knowledge of organizational structures and enterprise architecture with service and project management methodologies (BPMN, ITIL, and SIAM). Technical foundation in service design, development, and maintenance (REST APIs, SOA, and microservices), as well as data analysis and visualization using Python, SQL, Power BI, and Excel.

BUSINESS ADMINISTRATION – INTERNATIONAL ACADEMIC EXCHANGE **September 2024 – July 2025**
Shenzhen University, Shenzhen (China)

International academic experience in Shenzhen, one of China's leading technology hubs, studying business strategy, data analytics, operations management, and supply chain management in a multicultural environment. Exposure to a digital ecosystem significantly different from Western markets broadened my global business perspective and understanding of how information systems support business operations. This experience inspired me to continue studying Mandarin Chinese and to focus my bachelor's thesis on WeChat as a super-app, strengthening my interest in international markets, particularly China.

Relevant Coursework:

- **Management Information Systems:** Information systems in global business environments (ERP, databases, data security, and data governance) and their alignment with business strategy.
- **Big Data & AI:** Data analysis using Python (Pandas, Matplotlib), data preprocessing, machine learning models (regression, decision trees, clustering), and neural network fundamentals.
- **Simulation of Entrepreneurial Decision:** Strategic management of an international company through a competitive business simulation (Cesim Global Challenge), making production, R&D, marketing, and financial decisions across three markets, including demand forecasting and financial analysis.
- **Logistics and Supply Chain:** Logistics planning and optimization, including demand forecasting, inventory management, transportation, and Just-in-Time (JIT) procurement, with a focus on cost-to-service trade-offs.

PROJECTS & ADDITIONAL TRAINING

EY SAP TECHNOLOGY CONSULTING WORKSHOP **June 2024**
URJC & EY

Practical training in business models and project management methodologies applied to SAP technology consulting, using SAP EPM and SAP Analytics Cloud to address finance-related business challenges.
Practical Case Study: Designed a cost allocation model using SAP Analytics Cloud.

PISCINE DISCOVERY WEB **June 2024**
Campus 42, Telefónica

- **Web Development:** Gained foundational programming skills in HTML, CSS, and JavaScript through a hands-on web development project.
- **Teamwork & Coordination:** Coordinated a five-member team to develop and deliver the final project, promoting collaboration, knowledge sharing, and peer learning.

STARTUP PRE-INCUBATION PROGRAM – SANTANDER X EXPLOR **January 2022 – June 2023**
Banco Santander & Fundación UCEIF

- **Business Model Development:** Contributed to the development of DomesticGo, applying startup validation and business design tools, including Business Model Canvas, Customer Journey Mapping, and Minimum Viable Product (MVP) definition.
- **Project Planning & Management:** Coordinated a four-member team and managed project deliverables throughout a 12-week program, including prototype development, landing page creation, and funding strategy.
- **Milestone Tracking:** Successfully achieved **100% of the weekly milestones** established throughout the program.

PRIVATE TUTOR **February 2022 – Present**

- Delivered private tutoring in English, Mathematics, Physics, and Spanish Language and Literature to students aged 7–18, tailoring lessons to individual learning needs.
- Independently planned lessons and managed schedules while pursuing full-time university studies, supporting up to five students per week during peak demand.

LANGUAGES

- Spanish: Native.
- English: C1 Advanced (Cambridge English: Advanced – CAE)
- Mandarin Chinese: Basic proficiency, currently in the second year of language studies.
